

How to Add Libraries

(1) What are Libraries ?

Libraries are a collection of code that makes it easy for you to connect to a sensor, display, module, etc.

For example, the built-in LiquidCrystal library helps talk to LCD displays. There are hundreds of additional libraries available on the Internet for download.

The built-in libraries and some of these additional libraries are listed in the reference.

(2) How to Install a Library ?

Here we will introduce the most simple way for you to add libraries .

Step 1 : After downloading well the Arduino IDE, you can right-click the icon of Arduino IDE.

Find the option "Open file location" shown as below:

Step 2: Enter it to find out libraries folder, this folder is the library file of Arduino.

Step 3: Next to find out the “libraries” folder of 4DOF robot arm smart car (seen in the link: <https://fs.keyestudiocom/KS0520>), you just need to replicate and paste it into the libraries folder of Arduino IDE.

> KS0520 keyestudio 4 DOF Mechanical Robotic Arm Car Learning Kit

Name	Modified	Members
 PS2X_lib-ide1.8	--	Only you
 Servo	--	Only you

Copy the above libraries into libraries folder of Arduino.

Then the libraries of robot arm car are installed successfully, as shown below:
